Courses

- Computer Science and Engineering

PERSONAL PROJECTS

Amazon Product Scrapping (Pyhton/ Pandas/ Numpy) (12/2021 - 12/2021)

- <https://github.com/shashipy1/CredicxoShashi.git>
- Read the **csv** file, Fetch country **code** and **ASIN**.
- For every country & **ASIN** , frame a **URL** and make call for **scrap()** function.
- scrap()** function makes a GET request to the URL, with headers, used to ByPass **Restrictions** using User-Agent.
- Then scrap using **BeautifulSoup** & **lxml** parser library, Extracting Product Title, Product image URL, Product price, Product details.
- Create a dictionary of the product **attributes**, Append all the dictionaries into a list , Write the list into a **json** file

TextUtils : Text Analyzer (Python/Django) (08/2021 - 08/2021)

- <https://github.com/shashipy1/TextUtils.git>
- Data Generation** TextUtils can help you generate text or numbers. Data can be generated from the preloaded dictionary, random characters, or random numbers.
- I made analyzed** the function and wrote code for Remove Punctuation, Full Capitalization, Extra space remover, and Newlines.
- Number Formatting** TextUtils also offer basic formatting of numbers like adding a comma separator, decimal, rounding numbers etc.

Computer Task Automate: OK Google(Python) (09/2021 - 09/2021)

- <https://github.com/shashipy1/SearchGoogle.git>
- It helps to daily life run any **task** on your computer only for given command.
- It can send **emails** on your behalf play **music** for you, do **Wikipedia** searches for you.
- It is capable of opening **websites** like Google, Youtube, etc., in a web browser.
- It is capable of opening your code editor or **IDE** with a single voice command.

ATM Machine (Python) (01/2022 - 01/2022)

- <https://github.com/shashipy1/Sk-ATM.git>
- Enter your **password** , It gives information all about your money, like how much is **currently** available money in your account?
- You can **check** balance, **withdraw** balance, and **deposit** balance.

Color Code Copy (ReactJS) (01/2022 - 01/2022)

- <https://github.com/shashipy1/color-code.git>
- It generates **bands of colors** in a range of respective **RGB** value codes according to respective **HEX**.
- If you search any **color** code then find a color according to **darkness increasing order**.

Tour Places (ReactJS) (01/2022 - 01/2022)

- <https://github.com/shashipy1/tour-palces.git>
- This project is made by using an **API**, using this API's data made a tourist **website**.
- There are many wonder **foreign tourist places** and given **prices**.

Cocktail Website (ReactJS) (01/2022 - 01/2022)

- <https://sk-cocktails.herokuapp.com/>
- It is made by using an **API** and shows many Cocktails items.
- It can find your choices of **cocktail items** and when not present any cocktail items then show **No Cocktails Matched Your Search Criteria**.
- It is an **about page**, if the page link is not **matched** to about then click on the button and **back home**.
